**Opening hours: Weekdays 9am to 5pm**

### OUR LOCATION:

Goonawarra Day Hospital (GDH) is situated in the outer metropolitan suburb of Sunbury. It is located next to the Goonawarra Medical Centre. GDH provides day procedure services to the surrounding areas within the Hume City. We have patients from as far Lancefield and Kilmore (North), Trentham (West), Eltham (East) and Port Melbourne (South).

### OUR SPECIALIST SERVICES:

The Day Hospital offers a wide range of endoscopy, general surgery and eye surgery procedures. Our facility comprises of 2 theatres and 6 recovery room beds with state of the art modern and well equipped facility. Our staff are highly trained professionals who are committed to providing and ensuring the very best care for our patients. We aim to provide and promote the highest standards of care, to ensure patient safety and well being is of paramount importance.

### INFECTION CONTROL:

We are committed to the prevention of infection and we comply to pertinent guidelines and standards in infection control.

### PRIVATE HEALTH FUNDS:

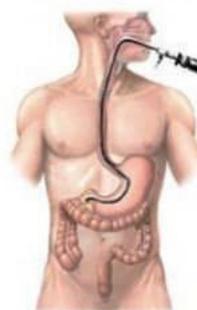

We have agreements with most Health Insurance Funds which minimise out of pocket costs. We also have the option of gap coverage schemes that can benefit you further. Please feel free to enquire about the extent of your health insurance cover with us. If you have a Pensioner Card, Health Care Card or Veteran Affairs Card please bring it with you on the day.

## Endoscopy

Our Specialists provides patients with affordable endoscopic examination. Endoscopy is a short, simple and very common procedure that allows the specialist to observe the inside of the body without performing major surgery using a thin lighted fiberscope known as the endoscope.

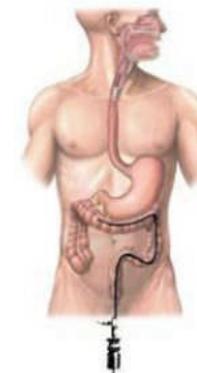

Upper endoscopy

**Gastroscopy** is the passage of the endoscope through the mouth into the stomach which allows the specialist to visually examine the lining of the oesophagus (gullet), stomach and duodenum (small bowel).

**Colonoscopy** is a procedure which allows the specialist to visually inspect the inside of the bowel by the insertion of the endoscope through the back passage. This painless procedure allows sampling of the lining (biopsy) or removal of small tumours or polyps.

Lower endoscopy

GDH patients are mainly referred by the GPs. However, we do accept open access gastroscopy and colonoscopy. Following the procedure, the reports will be forwarded to the referring doctor at the end of the procedure. All patients returned to referring doctors for follow-up and management

If you have any complaints or grievances please ask for a complaint form at the front reception and direct them to Complaints Officer, Priya Perera or the Director of Nursing, Marlee Foo on 9744 9955
